

## Constipation/Diarrhea, Urinary & Nausea Issues

Check with your vet, but the following are some products you might consider to help with **CONSTIPATION**:

Pumpkin (helps with both constipation and diarrhea)

Lactulose

Laxatone

Other hairball remedies

Rice bran

Benefiber (helps with both constipation and diarrhea)

Gastriplex (helps with both constipation and diarrhea)

Beet pulp

Increase water consumption

**stay away from sugar in any form and artificial sweeteners**

Check with your vet, but the following are products you might consider for **DIARRHEA**:

Pumpkin (helps with both constipation and diarrhea)

Gastriplex (helps with both constipation and diarrhea)

Benefiber (helps with both constipation and diarrhea)

Check with your vet, but the following products might be considered for **LOW URINE OUTPUT**:

**WARNING: If your cat does NOT urinate, this is a veterinary emergency that might indicate a serious blockage or infection, get them to a vet ASAP**

Increase water intake (add to food, syringe into mouth)

Tinkle tonic and other products to acidify urine

Check with your vet but the following products you might consider for **Nausea**:

ginger tea

reglan (from your vet)

smaller meals

1/4 pepcid AC (dose may be regulated to fit the need, ask your vet)

place food bowls higher up off the floor
